GulfcO Data Completeness
Evaluation

Hi Gary -

Per our conversation this morning, attached is a table describing those GulfcO data sets not meeting target completeness criteria along with an assessment of the implications for the risk assessment/nature and extent evaluation, and proposed corrective actions, where appropriate. Also attached is a memorandum from Taryn Scholz, the project QA manager, discussing the antimony in soil evaluation in more detail. Please let me know if you have any questions or comments on these attachments.

Thanks.
